

Priča o GEG-u

Stručni skup za voditelje Programa GLOBE

6. i 7. ožujka 2008.

OŠ Dubovac, Karlovac

Pripremila : Čeda Perko

Početak...

- Rujan 2007. - pripreme za GLOBE Train-the-Trainers Workshop (Međunarodni seminar za poučavatelje Programa GLOBE)
- Šefica Diana šalje prijavljenim hrvatskim GLOBE voditeljima mail:
“... vježbajte malo one unose tipa: zzzztest, da se ne blamiramo pred svijetom..”

Što je zzzztest????

- U nedovoljno jasnom mi je sjećanju ali;
- Imamo..

Jordanian Student creates Email Data Entry Generator!

08 September 2005

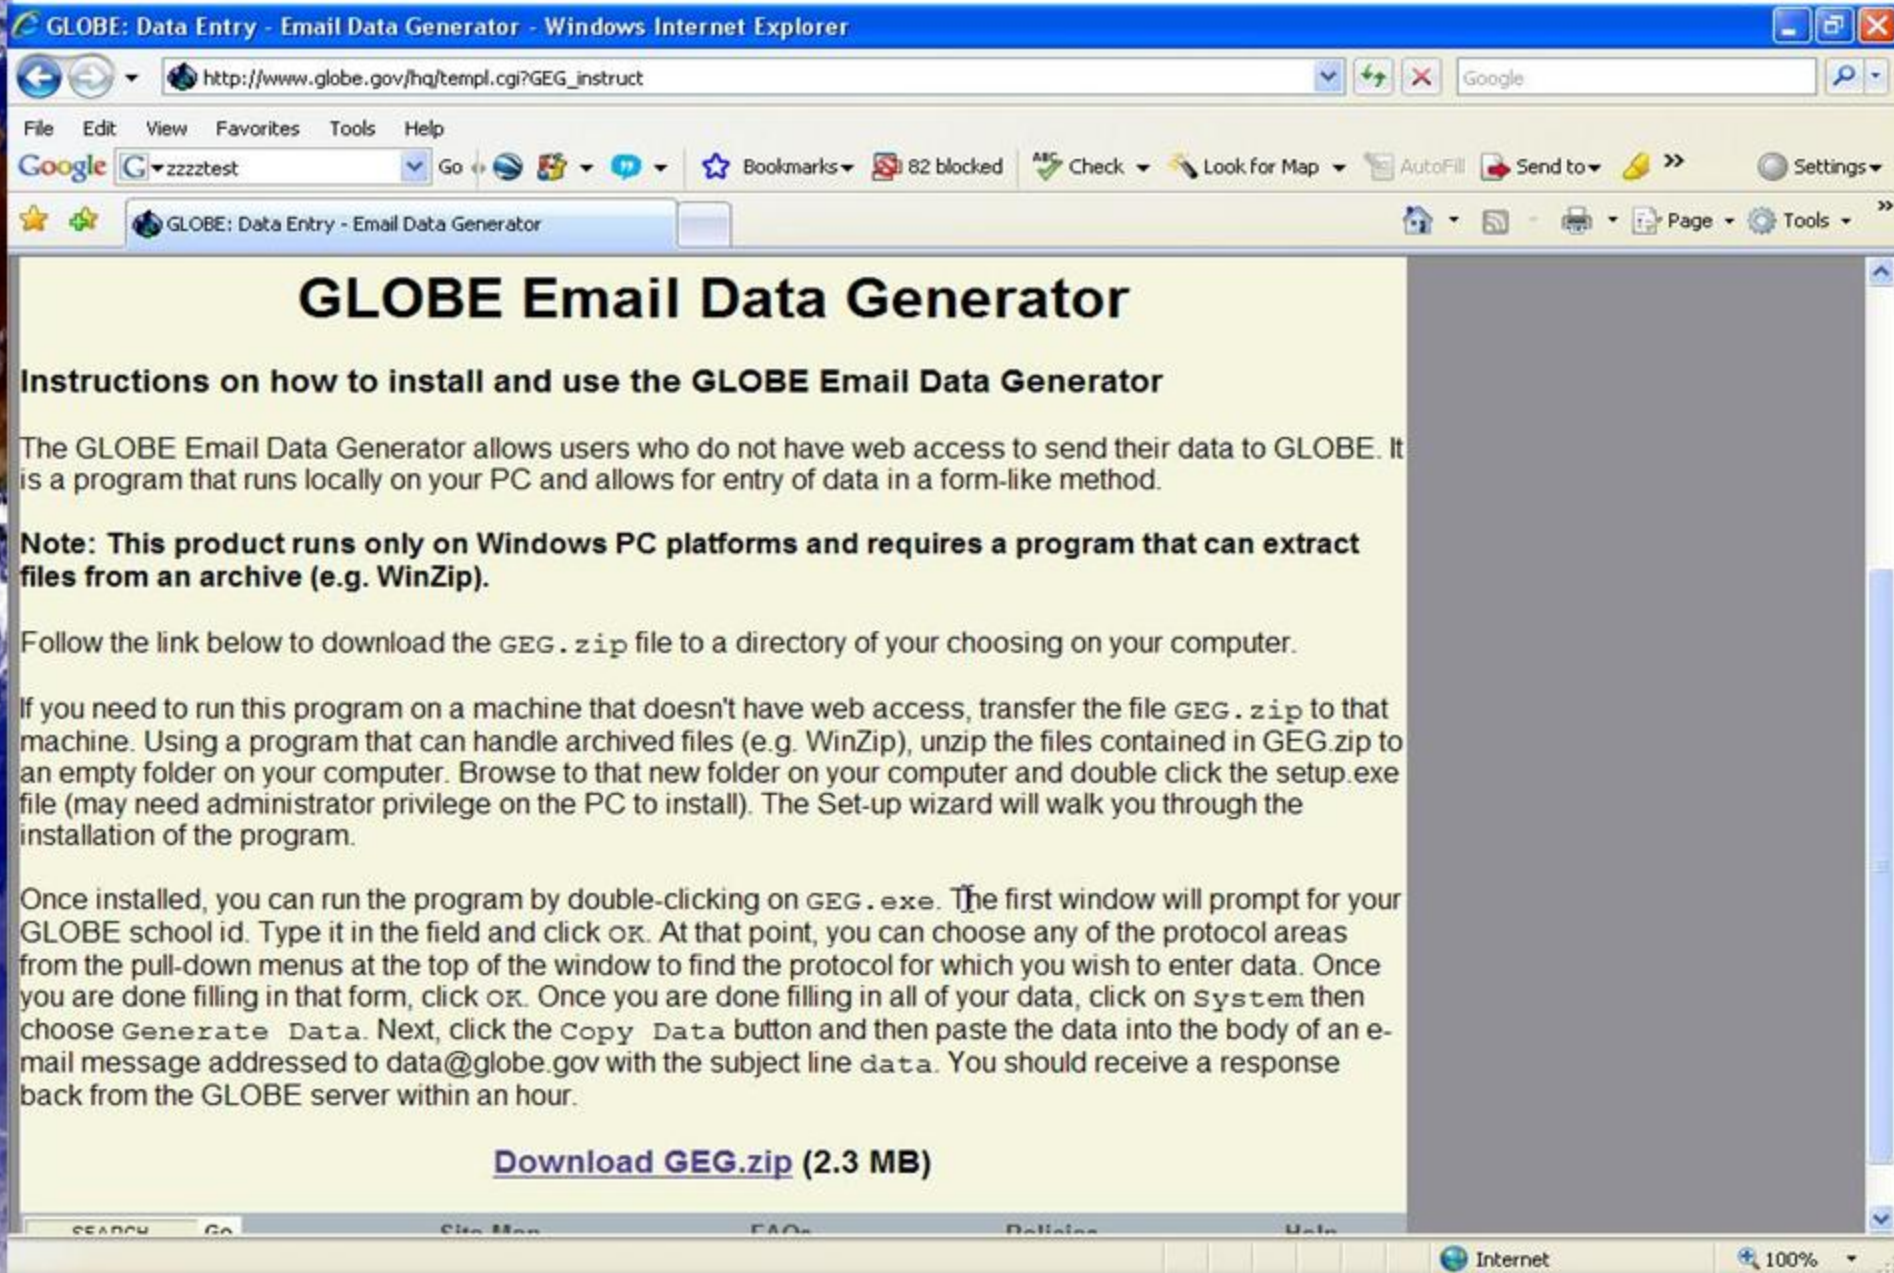

Have you ever entered your GLOBE data via E-mail? It's a fantastic method of sending large amounts of data to the GLOBE database. However, it can be a bit overwhelming and difficult to understand the codes necessary to enter data. A former Jordanian GLOBE student has developed a program to help overcome these problems.

Mohammad Abu Musa began working with the GLOBE Program in 1999 while a student at the Irbid Pioneer Center, in Irbid, Jordan. Two years later, being very impressed with the goals and mission of the program, he began working with Mr. Raouf Dabbas, the President of the Jordanian Friends of the Environment Society and Country Coordinator for GLOBE Jordan. Mohammad attended the 2nd Regional Student Conference in Lebanon and later, with the assistance of the GLOBE Program Office, created the [GLOBE Email Data Generator \(GEG\)](#). Mohammad is currently attending the Jordanian University of Science and Technology, in Irbid.

The GLOBE Email Data Generator allows GLOBE teachers and students who do not have Internet access to send their data to GLOBE. It is a program that operates locally on your computer and creates a form containing the data you enter. Not sure how it will operate - or how easy it will be? Use ZZZZTEST as the School ID and take the GEG for a test drive!

Global Learning and Observations to Benefit the Environment

GLOBE Email Data Generator

Instructions on how to install and use the GLOBE Email Data Generator

The GLOBE Email Data Generator allows users who do not have web access to send their data to GLOBE. It is a program that runs locally on your PC and allows for entry of data in a form-like method.

Note: This product runs only on Windows PC platforms and requires a program that can extract files from an archive (e.g. WinZip).

Follow the link below to download the `GEG.zip` file to a directory of your choosing on your computer.

If you need to run this program on a machine that doesn't have web access, transfer the file `GEG.zip` to that machine. Using a program that can handle archived files (e.g. WinZip), unzip the files contained in `GEG.zip` to an empty folder on your computer. Browse to that new folder on your computer and double click the `setup.exe` file (may need administrator privilege on the PC to install). The Set-up wizard will walk you through the installation of the program.

Once installed, you can run the program by double-clicking on `GEG.exe`. The first window will prompt for your GLOBE school id. Type it in the field and click `OK`. At that point, you can choose any of the protocol areas from the pull-down menus at the top of the window to find the protocol for which you wish to enter data. Once you are done filling in that form, click `OK`. Once you are done filling in all of your data, click on `System` then choose `Generate Data`. Next, click the `Copy Data` button and then paste the data into the body of an e-mail message addressed to `data@globe.gov` with the subject line `data`. You should receive a response back from the GLOBE server within an hour.

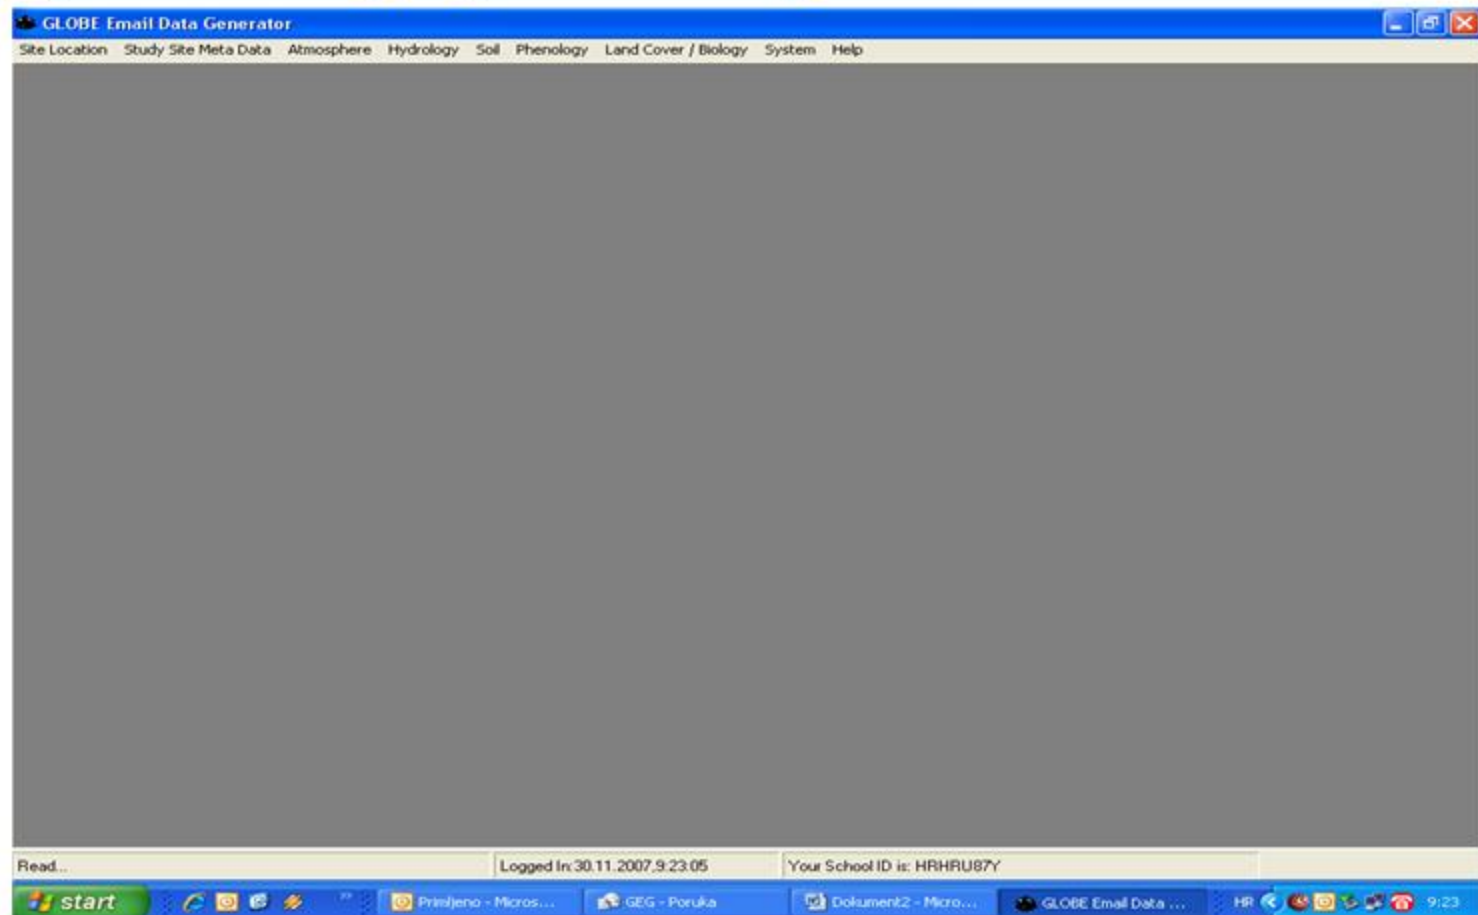

[Download GEG.zip \(2.3 MB\)](#)

The **GLOBE** Program

Korištenje GLOBE Data E-mail Generatora

Kad ga pokrećete najprije trebate unijeti school ID - HRHRXXXX

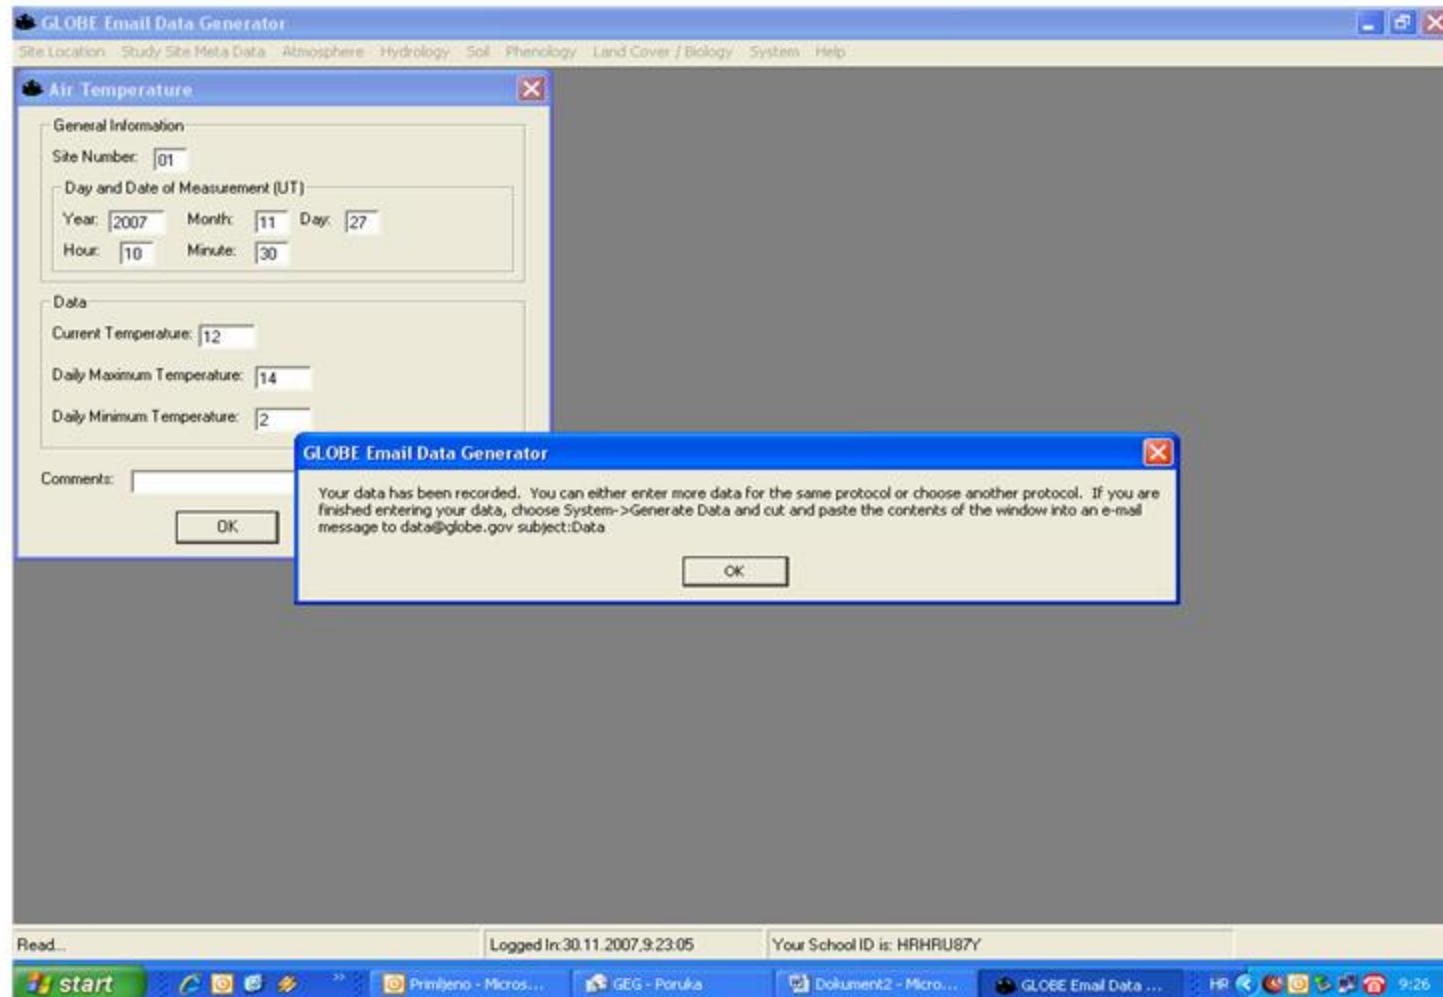

Korištenje GLOBE Data E-mail Generatora

U gornjem izborniku imate područja unosa:
Site location , Study Site Meta Data,
Atmosphere,.....pa izaberete što želite
unijeti.

Ja sam izabrala Air temperature i unijela
podatke.

Potvrdite s OK i javlja se poruka da su vaši
podaci pohranjeni.

Global Learning and Observations to Benefit the Environment

The screenshot displays the GLOBE Email Data Generator application. The main window is titled "Air Temperature" and contains the following fields:

- General Information:**
 - Site Number: 01
 - Day and Date of Measurement (UT):
 - Year: 2007
 - Month: 11
 - Day: 27
 - Hour: 10
 - Minute: 30
- Data:**
 - Current Temperature: 12
 - Daily Maximum Temperature: 14
 - Daily Minimum Temperature: 2
- Comments:** (empty text box)

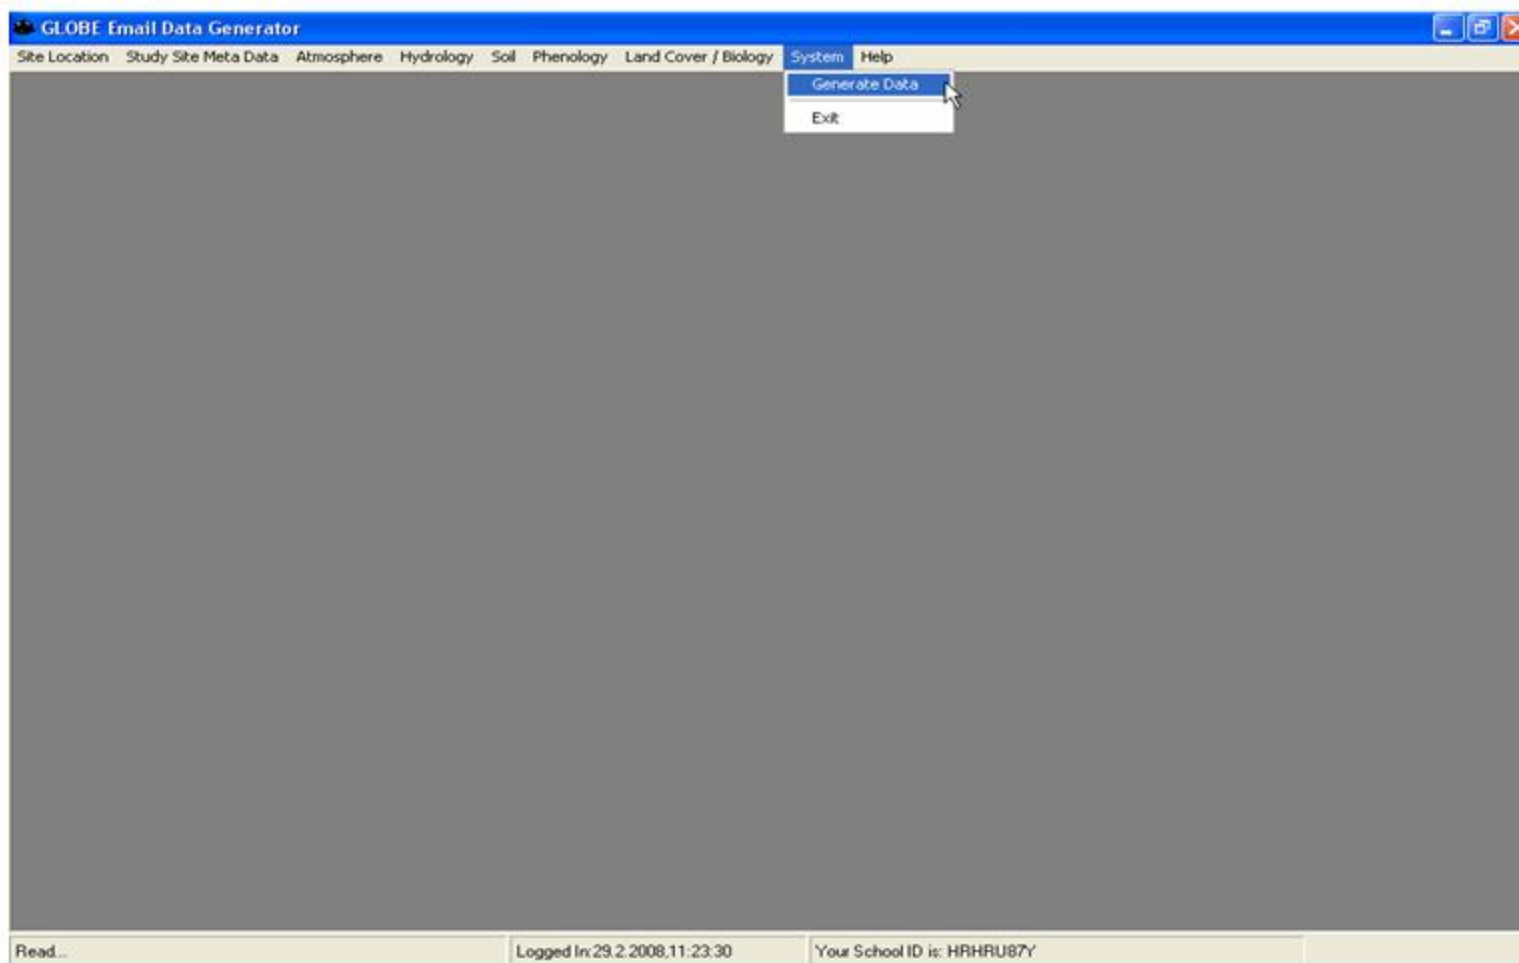

An "OK" button is located at the bottom of the main window. A smaller dialog box titled "GLOBE Email Data Generator" is overlaid on the main window, displaying the following message:

Your data has been recorded. You can either enter more data for the same protocol or choose another protocol. If you are finished entering your data, choose System->Generate Data and cut and paste the contents of the window into an e-mail message to data@globe.gov subject:Data

An "OK" button is also present on this dialog box. The taskbar at the bottom shows the Windows start button, several open applications (including "Priljeno - Micro...", "GEG - Poruka", and "Dokument2 - Micro..."), and the system clock showing 9:26.

Global Learning and Observations to Benefit the Environment

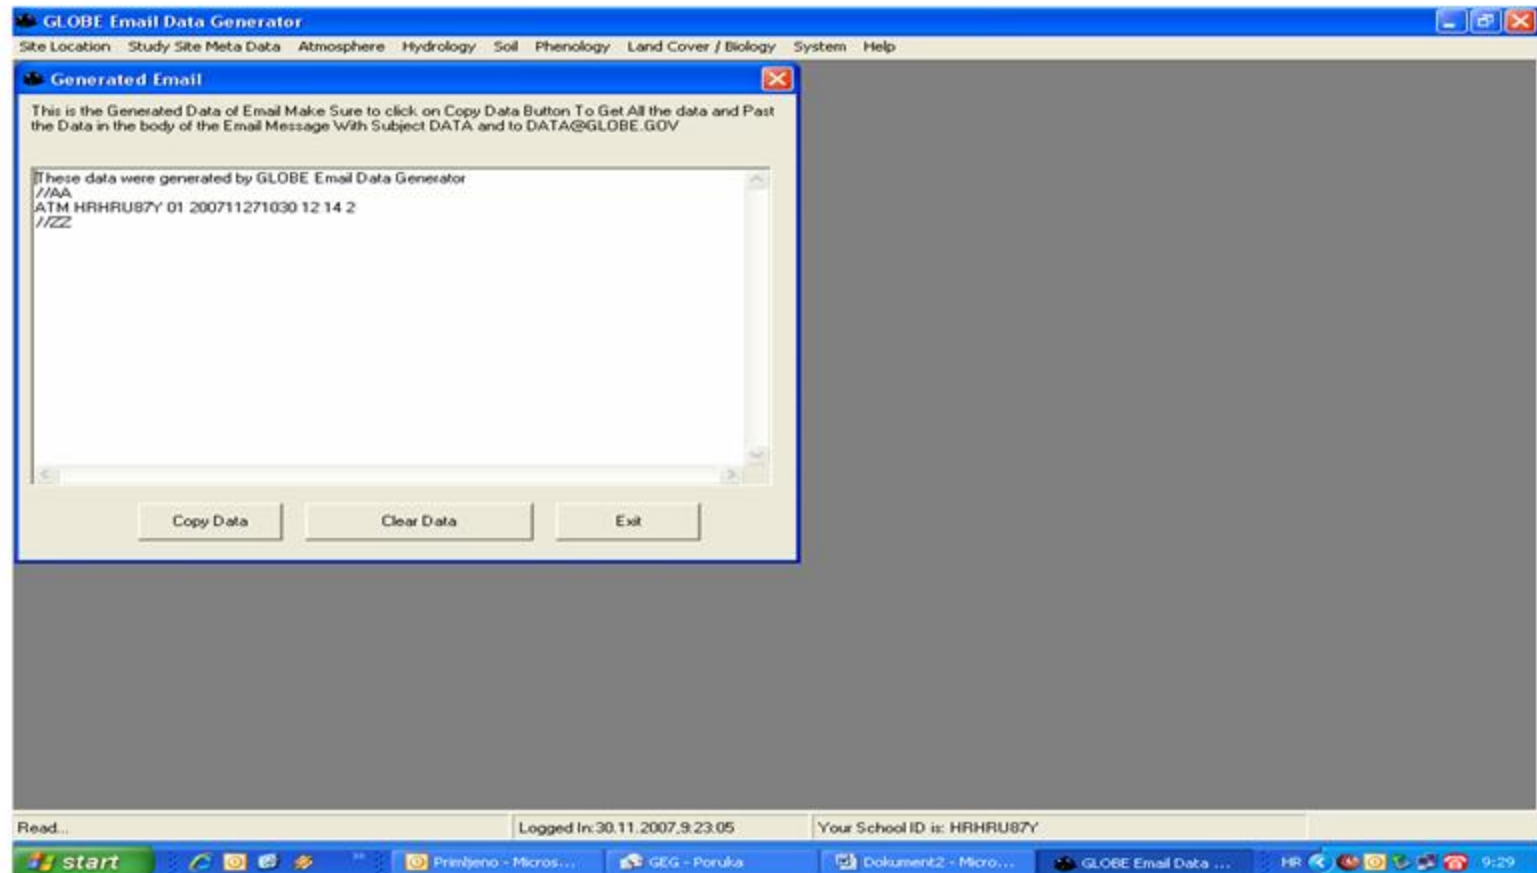

Sada izaberete System > Generate Data

The **GLOBE** Program

Global Learning and Observations to Benefit the Environment

Potvrdite Copy Data i zalijepite u E- mail poruku koju adresirate na data@globe.gov, sa Subject: DATA za „stvarno slanje podataka“ ili practicedata@globe.gov za vježbanje slanja podataka.

I na kraju.....

Hvala na pažnji !!!
